

Temperature Sensitive

Activity

1. Fill a metal container with room temperature water.
2. Add a thermometer and wait for it to adjust to the temperature of the water.
3. Put your hand next to the container and notice how it feels.
4. Record your observation in your lab journal.
5. Add ice cubes.
6. Observe what happens to the sides of the container and the temperature of the water.
7. Put your hand next to the container again and make observations.
8. Record your observations in your lab journal.
